

Terko Satin™

Cotton/Polyester Corespun

Ticket 36

Item No. 1487036/Col Ref

Reel Size 2500m

Coats Terko Satin™ is a cotton wrapped polyester corespun thread with a glacé finish. As a corespun thread Terko Satin™ combines the high tenacity and strength of a polyester filament core with a cotton wrap, delivering the sewing performance of a continuous filament thread, yet providing the matt appearance of cotton.

The cotton wrap protects the polyester core from needle heat even in the most demanding of applications. The glacé finish is imparted through a special polishing process which binds together the fibrous surface of the thread and creates a lustrous finish to the thread with enhanced abrasion resistance.

Suitable for all materials, but ideal for cotton and linen fabrics.

Characteristics:

- Polished glacé finish
- Tangle resistant
- Enhanced tear and abrasion resistance
- High tensile strength, for strong seams
- Controlled stretch characteristics yield excellent sew ability with tight, firm stitches

Best suited for:

- Ideal for hand sewing
- For decorative seams/ornamental stitches (i.e. Pin Tucks, attaching Braids, piping) and backstitch seams and buttonholes
- Automatic machines
- Suitable for outdoor applications. In wet weather, the cotton wrap absorbs water and swells to fill the needle holes. This prevents water leaking through the seams
- Recommended Hand Sewing Needle No.7 or Machine Needle size: Universal 110-130

Hand Sewing:

John James Long Needles Item No. L4316/007

Prym Item No. 121302

Machine Needles:

Prym Size 110 Item No. 152295
