Signature COLLECTION

LAMINATED ROLLER BLINDS

Discover a world of possibilities with Signature Laminated Roller blinds

Transform the fabric of your choice into a beautiful bespoke roller blind, designed to complement your interior perfectly. Simply select your fabric, send it to us, and we will create a made-to-measure laminated roller blind that brings your vision to life.

Whether you are coordinating with existing soft furnishings or creating something entirely unique, Signature Laminated Roller blinds offer a seamless way to achieve a refined, cohesive look in any space.

Style meets practicality

Combining elegant design with everyday functionality, Laminated Roller blinds offer a sleek, compact option that sits neatly within your window. Unlike Roman blinds, which require depth for their folds, roller blinds allow more natural light into the room while maintaining a clean, modern appearance.

With a choice of laminate linings, you can achieve the perfect balance of privacy and light control, from gentle light filtering to full blackout.

Bespoke by design

Our Laminated Roller blinds are a distinctive alternative to traditional roller blinds. Using your own fabric, each blind is truly one of a kind.

We carefully bond a specially coated lining to the back of your chosen fabric, giving it the structure needed for a flawless Roller finish while enhancing the look and feel of the design.

Choose from standard or blackout finishes, all completed with neatly overlocked edges for a durable, high-quality result.

Simple to create

Our easy-to-use online configurator guides you through every step of the process, making it simple to design and order your perfect blind.

From fabric selection to final specification, everything is designed to ensure a smooth experience and a beautifully finished, child-safe product every time.

Made for your space. Designed by you

Signature Laminated Roller blinds give you the freedom to create something truly personal, combining style, performance, and simplicity in one elegant solution

Upgrade to motorised

Upgrade your home with battery-powered motorised blinds, designed for convenience, safety, and effortless everyday use.

With no wiring required, installation is quick and simple, making it an ideal solution for any space. Motorisation enhances child safety while offering intuitive control through handsets, wall switches, or an easy-to-use app.

Adjust light and privacy with ease, bringing a new level of comfort and control to your home at the touch of a button.

Specifications Required

Detail	Standard Specification	Additional Options
Control Type	Chain	Motorised (Somfy & Eve Motion)
Chain Colour	Silver	White, Antique Brass, Anthracite, Black Nickel, Black
Control Side	Right	Left
Control Drop	Installation height minus 150cm	Any desired drop, within child safety legislation
Bracket Options	Standard universal	Universal extension Eve Motionblinds brackets (Plastic) White, Grey, Black Eve Motionblinds brackets (Metal) White, Grey, Black
Bracket Colour	White	Anthracite, Black
Cassette Options	Full Fascia White up to 160cm drop	Anthracite, Black up to 160cm drop or fabric covered
Bottom Bar	Fabric Covered	
Backing	Cream lining	White lining Cream Blackout Flame Retardant lining White Blackout Flame Retardant lining If the blind includes fabric joins, we recommend choosing a blackout lining to prevent the seams from showing through in the light.
Fabric Mounting	Standard roll - Fabric falls backwards off the barrel. Please be aware that the lining will be visible on the barrel if choosing this option	Reverse roll - fabric falls forwards off the barrel. The barrel will not be visible if choosing this option.

*We encourage customers to specify their desired chain drop, but all blinds will be made to comply to child safety legislation.

IMPORTANT: Due to the nature of laminated fabrics, the depth of fabric around the roller is larger than with normal fabrics. Laminated Roller blinds are supplied on 32mm, 40mm or 45mm diameter tubes (Motorised blinds are supplied on 32mm or 40mm only). We will select the most suitable barrel diameter, based on the size and weight of the blind. If you have a preference of barrel diameter, please inform us on the order form in the "Any additional information" field. For detailed product information, fabric requirements, and specifications, please refer to the product information tab against item No. **SIG/LR** on www.hallishudson.com

How to Order

1. Measure your window

When measuring inside the window recess, measure the width and drop in several places to allow for any variation, then give us the smallest width and drop measurements in centimetres. When measuring outside the window recess, measure the width and drop desired to cover your window fully. We recommend an overlap of 70mm on the width and drop.

Please note that when we manufacture Laminated Roller blinds the actual fabric width size will be 35mm narrower than the overall measurements you have given us; please ensure that this still gives sufficient coverage.

2. Select your fabric

Cotton prints or polyester based fabrics as well as printed patterns are a popular choice for Laminated Roller blinds, there are some fabrics however that aren't recommended for lamination.

We do not recommend:

Checked and striped designs as any slight variation on the pattern will be immediately obvious.

Embroidered patterns as they can cause the fabric to move during lamination meaning accurate pattern matching is very difficult to achieve.

Dual layered fabrics as once laminated they will leave a 'baggy' effect as only the back layer will be laminated, this can vary across different fabrics with some being more noticeable than others.

In addition, the following fabrics are not stable enough to handle the lamination process, so we consider these to not be suitable:

These include sheers, voiles, velvets, seersuckers, silks and acetate-based fabrics.

A sample of your chosen fabric is required for testing before committing to the order. For testing, please supply a sample approximately A4 size (29.7 x 21cm) to ensure accurate test results.

3. Important steps for preparing and sending your fabric

- Once the customer has selected their fabric to be laminated, please ensure you follow the guidelines provided before sending us your fabric.
- Ideally all fabrics must be sent on a roll but can be sent folded neatly
- All fabric that we receive is assumed to be in acceptable condition.
- We are happy to accept fabric sent directly from your supplier; however, please note that we are unable to inspect it for faults. The fabric will be used as received, and assumed to be in an acceptable condition to laminate, so we strongly recommend that you check it prior to dispatch to ensure it is the correct design, colour, and quality.
- Please make sure your fabric is labelled correctly so we can easily identify. Please indicate the top, bottom and correct side of the fabric.
- Ensure that sufficient fabric is sent for manufacturing, considering any joins and pattern matching that may be required. All fabric to be laminated must be at least 5cm wider than the blind width and 35cm longer than the drop of the blind required.
- If the fabric is patterned and joins are necessary or individual blinds require to be pattern matched, please allow additional fabric for the pattern repeat (at least one full pattern repeat extra), in addition to the above allowances.
- If the size of the blind ordered is wider than the useable width of the fabric being supplied, then two pieces will be required for joining. This will be done prior to lamination with a central panel and two vertical joins unless otherwise specified.
- Some loss of pattern may occur at the joins, and it is not always possible to obtain an exact pattern alignment when joining fabrics.

All lamination is done entirely at the customer's own risk.

5. Send your fabric to Hallis Hudson

Please ensure your order number, fabric name and colour are clearly marked on the fabric roll.

6. Your Laminated Roller blind arrives

We are proud of our products and our quality, and we are confident you will be happy with it too but should happen to experience a faulty or damaged product please do get it touch, so we can resolve this for you.

Made to Measure In the UK Expertly Manufactured

Proudly made here in the UK

We have been manufacturing Made to Measure products for over 3 decades and are proud of the reputation we've built for some of the best products, and quickest lead times in the industry. We have large scale template printers to ensure accuracy and compliance to measurements, automated state-of-the-art production machinery, and fully trained staff to ensure your customer satisfaction. To support you in your choices our technical experts are a call away to provide advice as and when you
